

BAYVIEW

Bring colour into your life

BAYVIEW

With the Bayview project, Cascais takes on a whole new look as well as assuming a new presence.
Discover for yourself, bring colour into your life.

An aerial photograph of a coastal town, likely Cascais, Portugal. The image shows a mix of traditional residential buildings with red-tiled roofs and modern apartment complexes. A new development, 'Bayview', is highlighted in the center, featuring modern buildings with green roofs and a large, landscaped park area with a winding path and a small body of water. The town is situated along a coastline with a sandy beach and the ocean. A road and railway line run parallel to the coast. The sky is clear and blue.

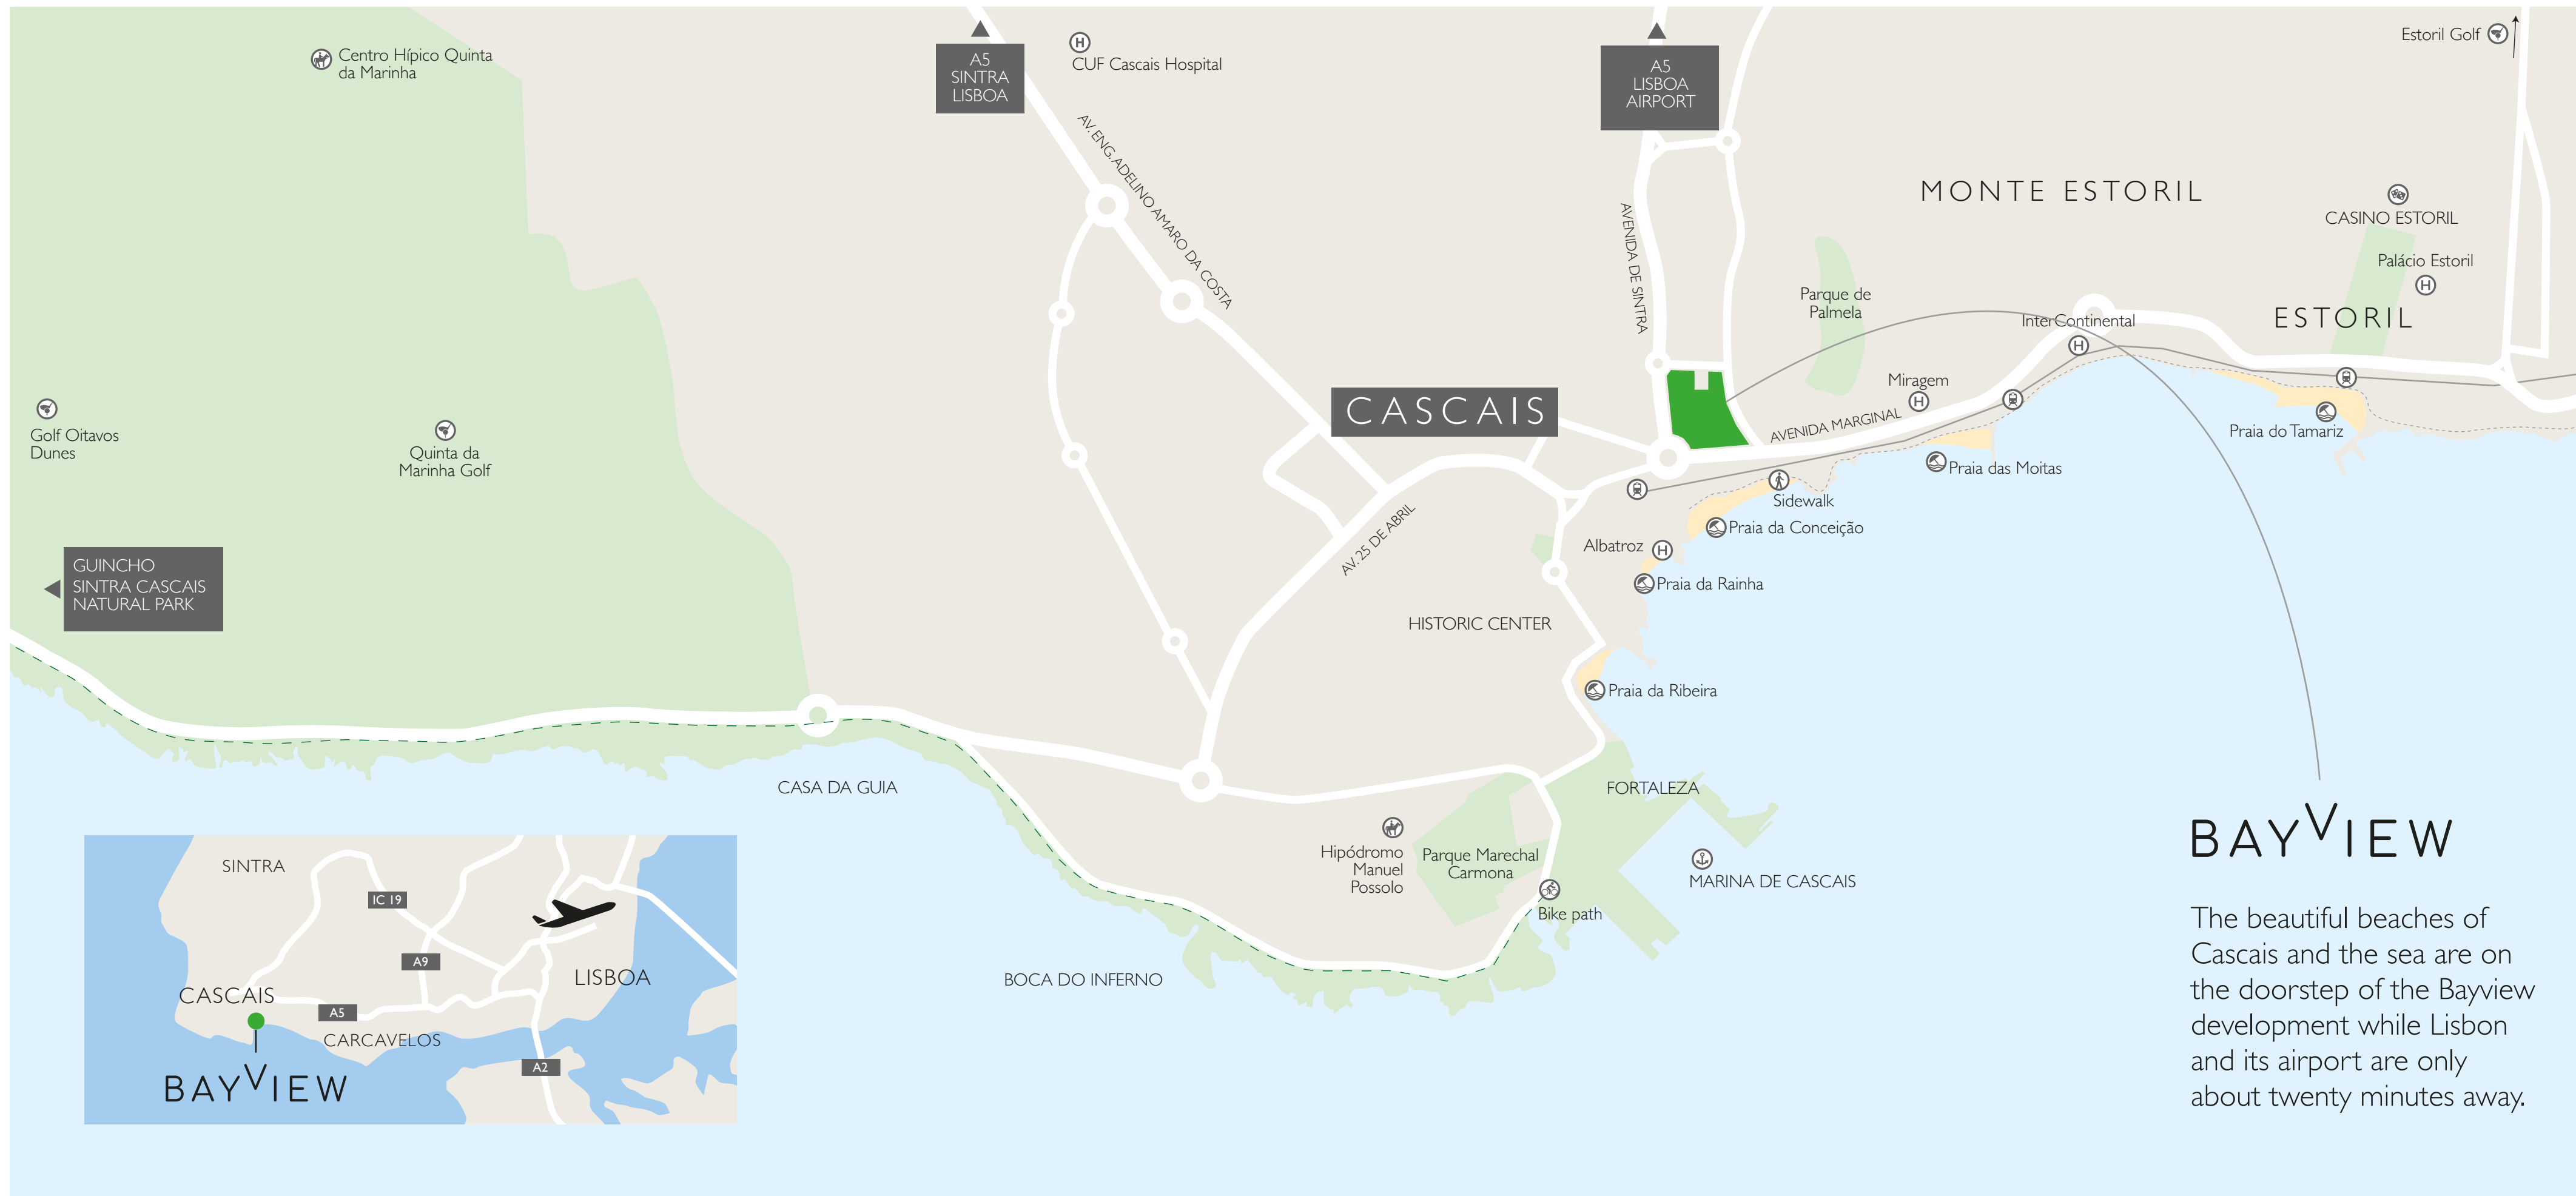

Your gateway to a new life

Much more than just an extraordinary real estate development, Bayview transforms the eastern access of Cascais into the town's most beautiful gateway with your apartment on one side and the Ocean on the other. A place where every day is a pleasure.

LOCATION

Portugal's very own Riviera

Unbeatable charm. Aristocratic
legacy. Beaches bathed by the
Atlantic. Welcome to Cascais,
welcome to your future.

A tradition of well-being

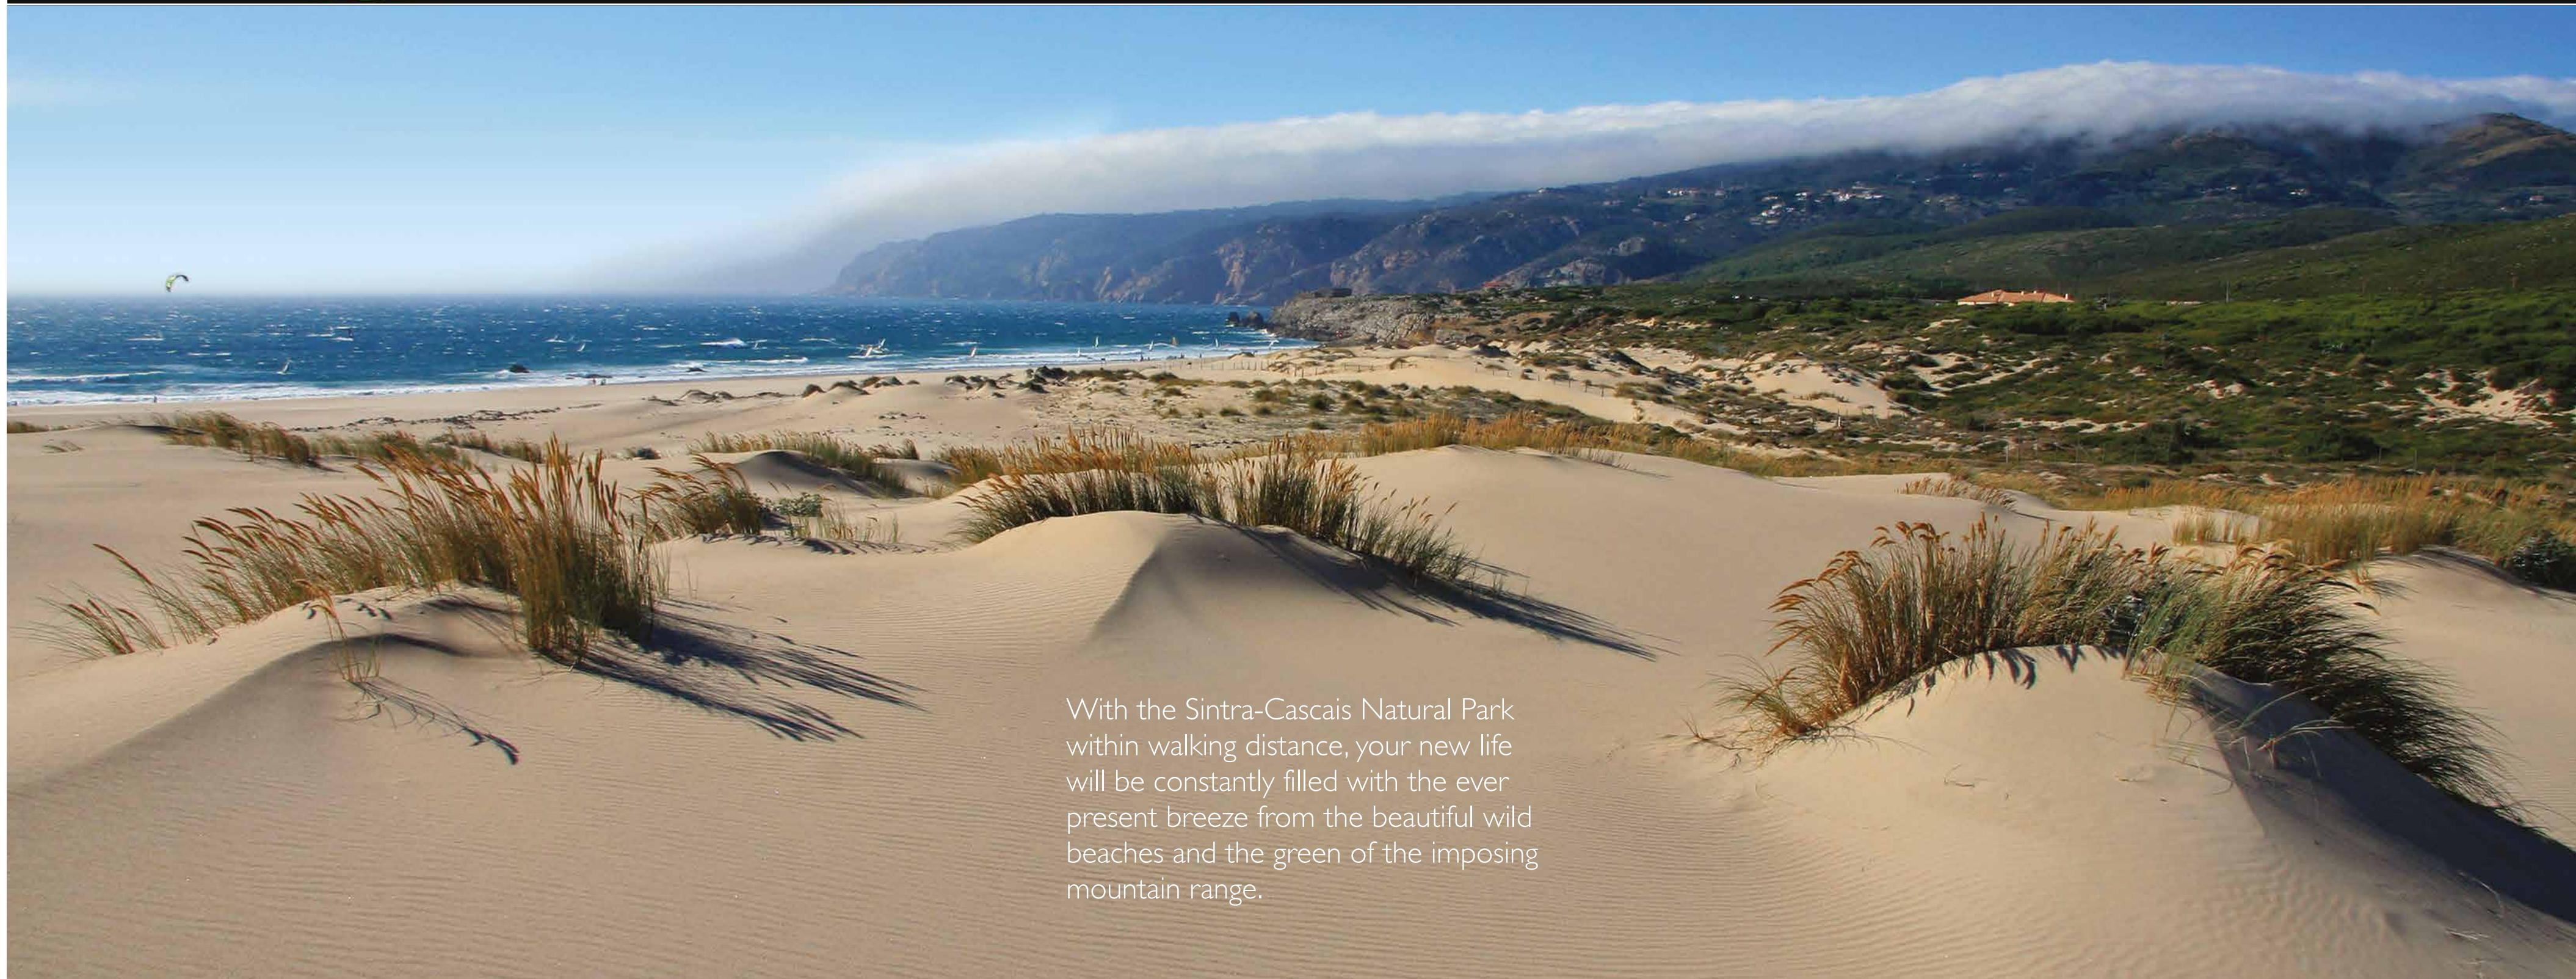

Since the 1870's when the Portuguese Royal Family adopted Cascais as their summer residence, it has become synonymous with quality living among discerning people.

A heritage of sophistication combined with a first class contemporary look, this is the town's secret where the past and future are brought together in a mix of quality restaurants, palaces and hotels. This is the enduring charm that is Cascais.

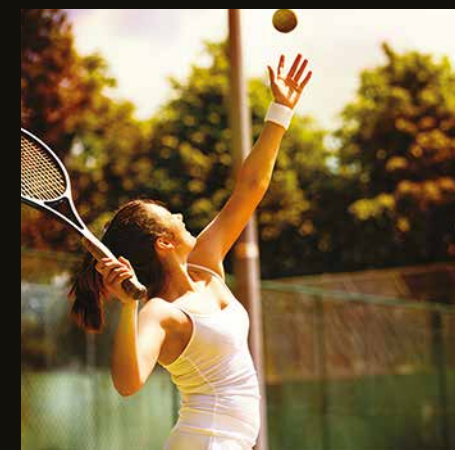

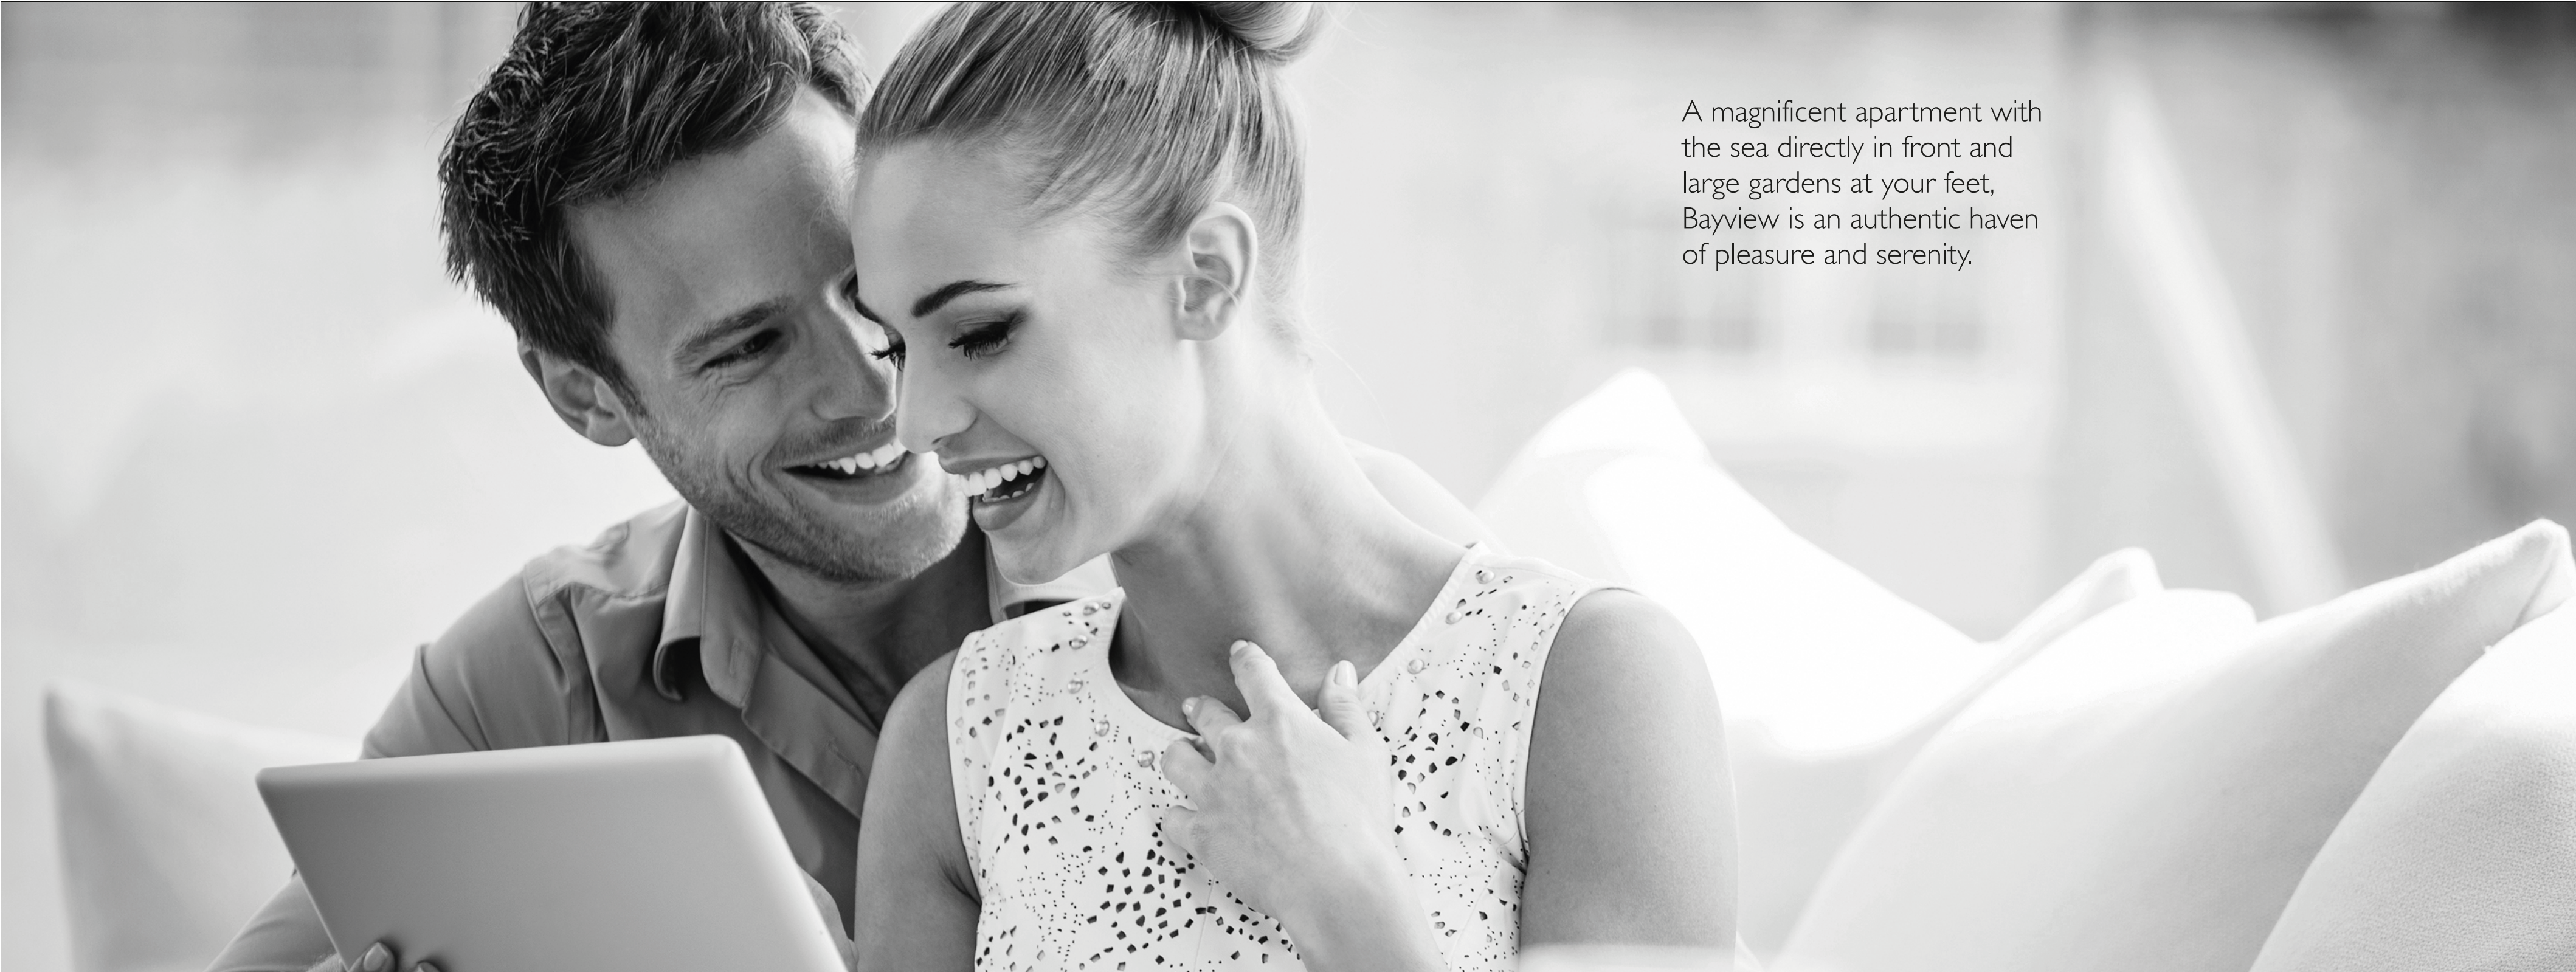

With the Sintra-Cascais Natural Park within walking distance, your new life will be constantly filled with the ever present breeze from the beautiful wild beaches and the green of the imposing mountain range.

From golf and tennis to horseback riding and water sports, Cascais offer a myriad of sporting possibilities. And furthermore given its strategic location, there is an ever-present temptation to visit cosmopolitan Lisbon or romantic Sintra.

Life from a new perspective

A magnificent apartment with the sea directly in front and large gardens at your feet, Bayview is an authentic haven of pleasure and serenity.

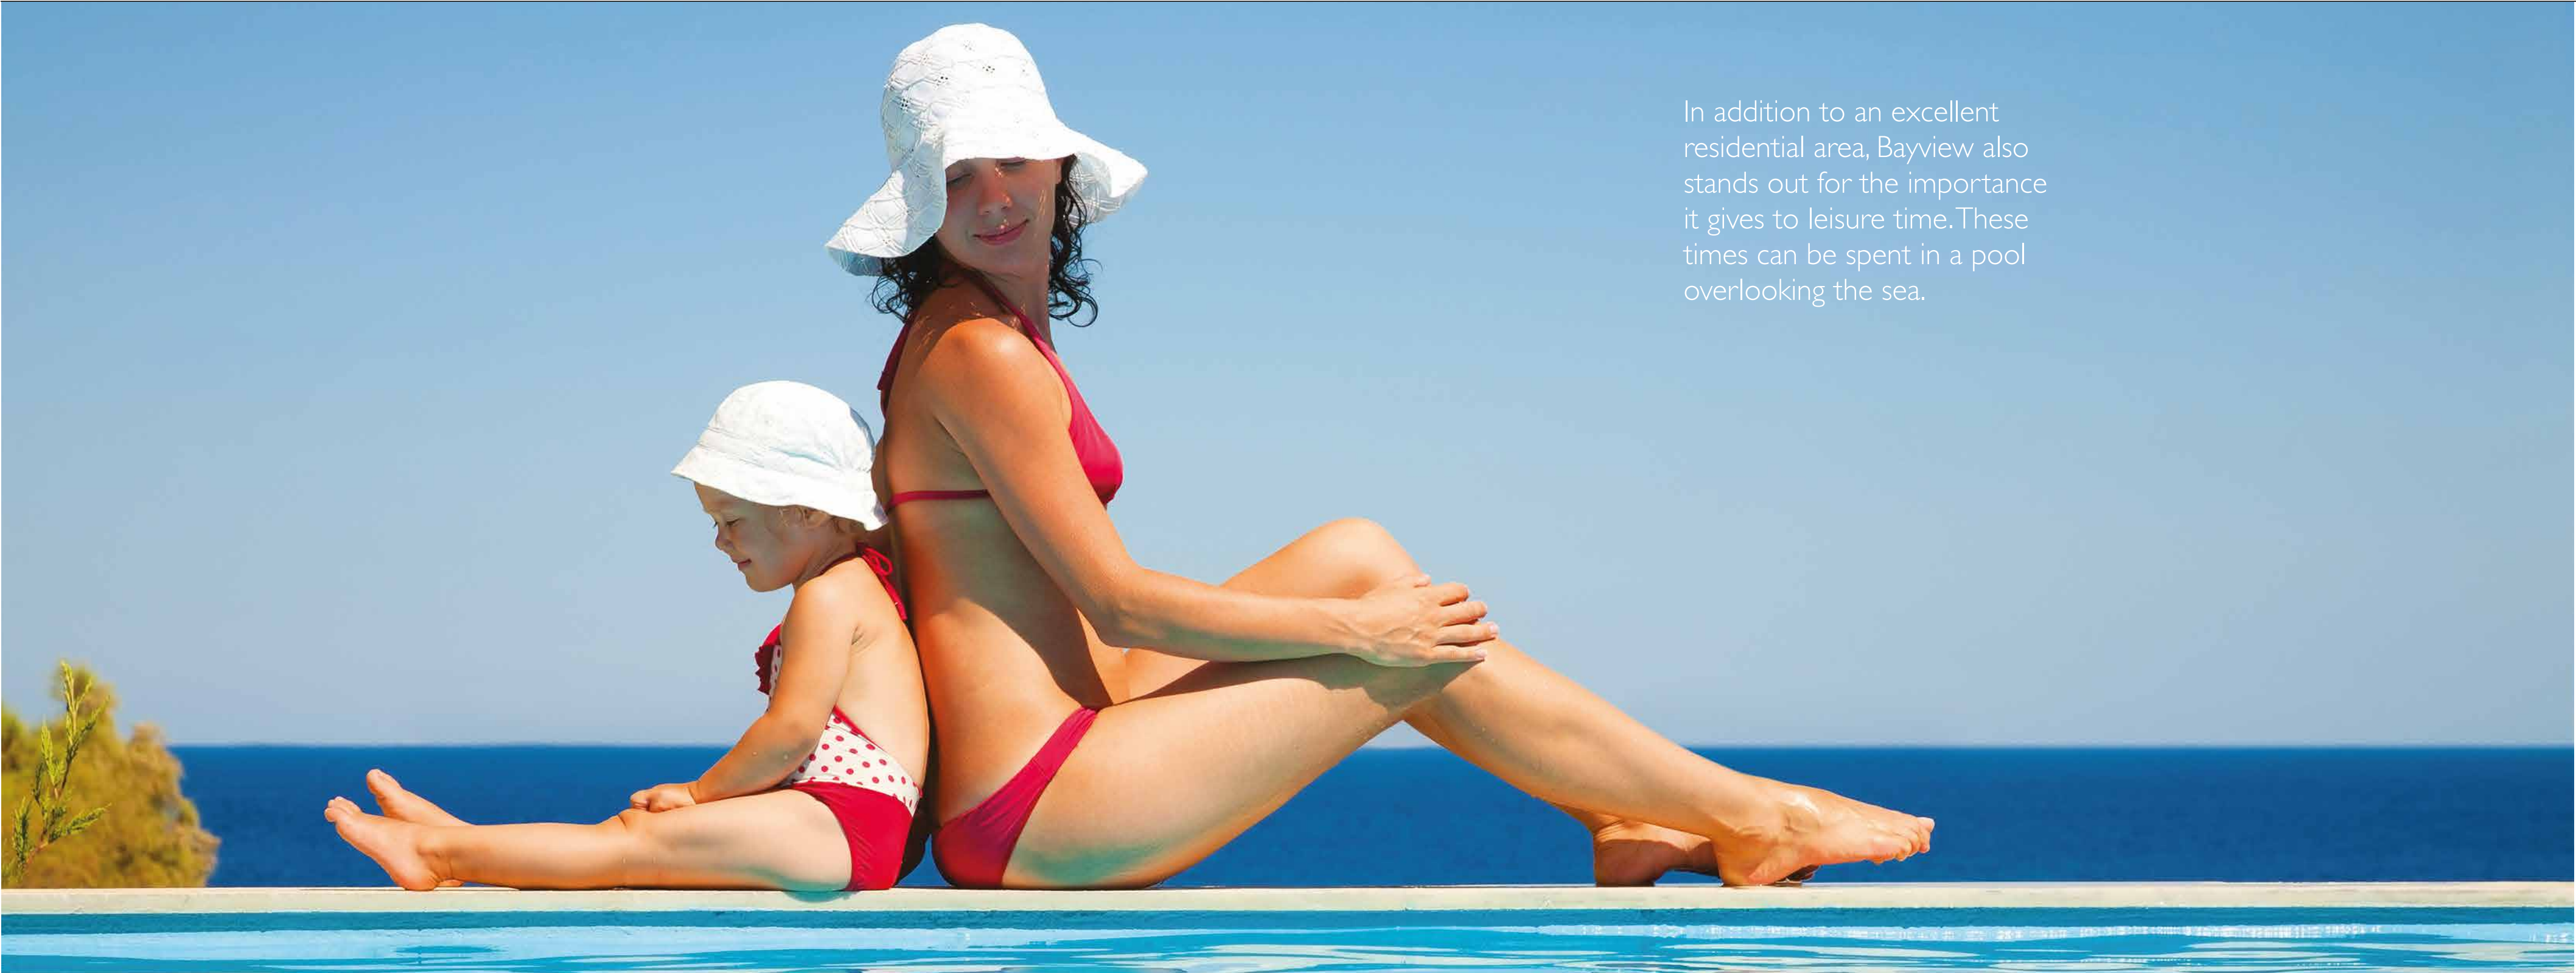

HORIZON

With a surface area of around 21,700 sqm and careful consideration for the ecological and environmental impact, Bayview is the most significant urban renewal Cascais has witnessed in the last decade.

First class leisure facilities

In addition to an excellent residential area, Bayview also stands out for the importance it gives to leisure time. These times can be spent in a pool overlooking the sea.

Located alongside the beautiful Avenida Marginal road and close to the historical centre of Cascais, the development also has a lush green area, which is complemented by a shopping area with restaurants and cafés.

With the Atlantic Ocean only a few meters away, the beach is an inseparable part of Bayview. Whether on the beach or on the promenade, there are plenty of opportunities to enjoy your free time.

BAYVIEW

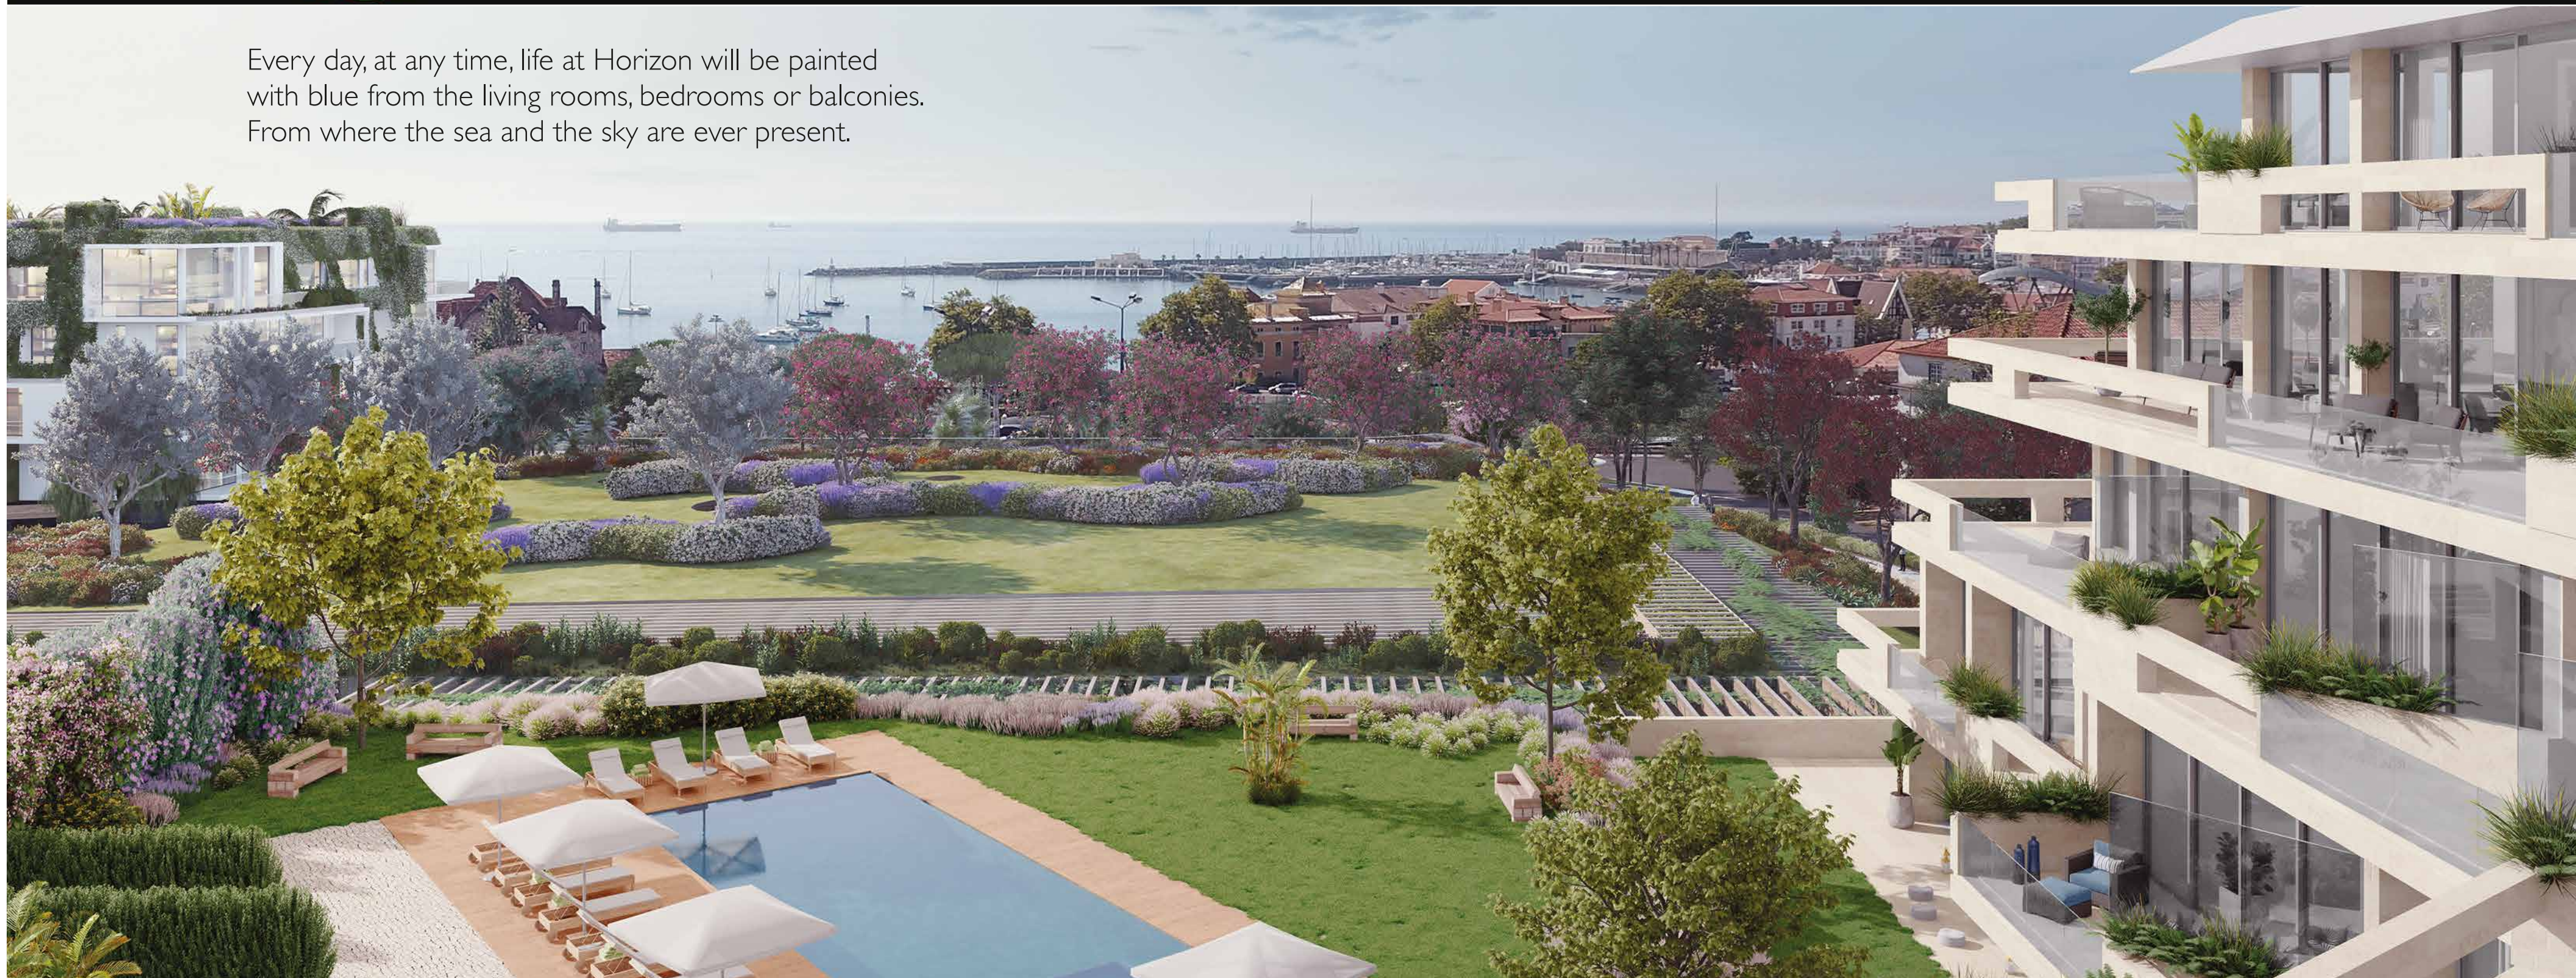

HORIZON

Situated in the northwestern part of the condominium,
Horizon is, due to its architectural presence, the most
prominent building of the development.

A stunning horizon

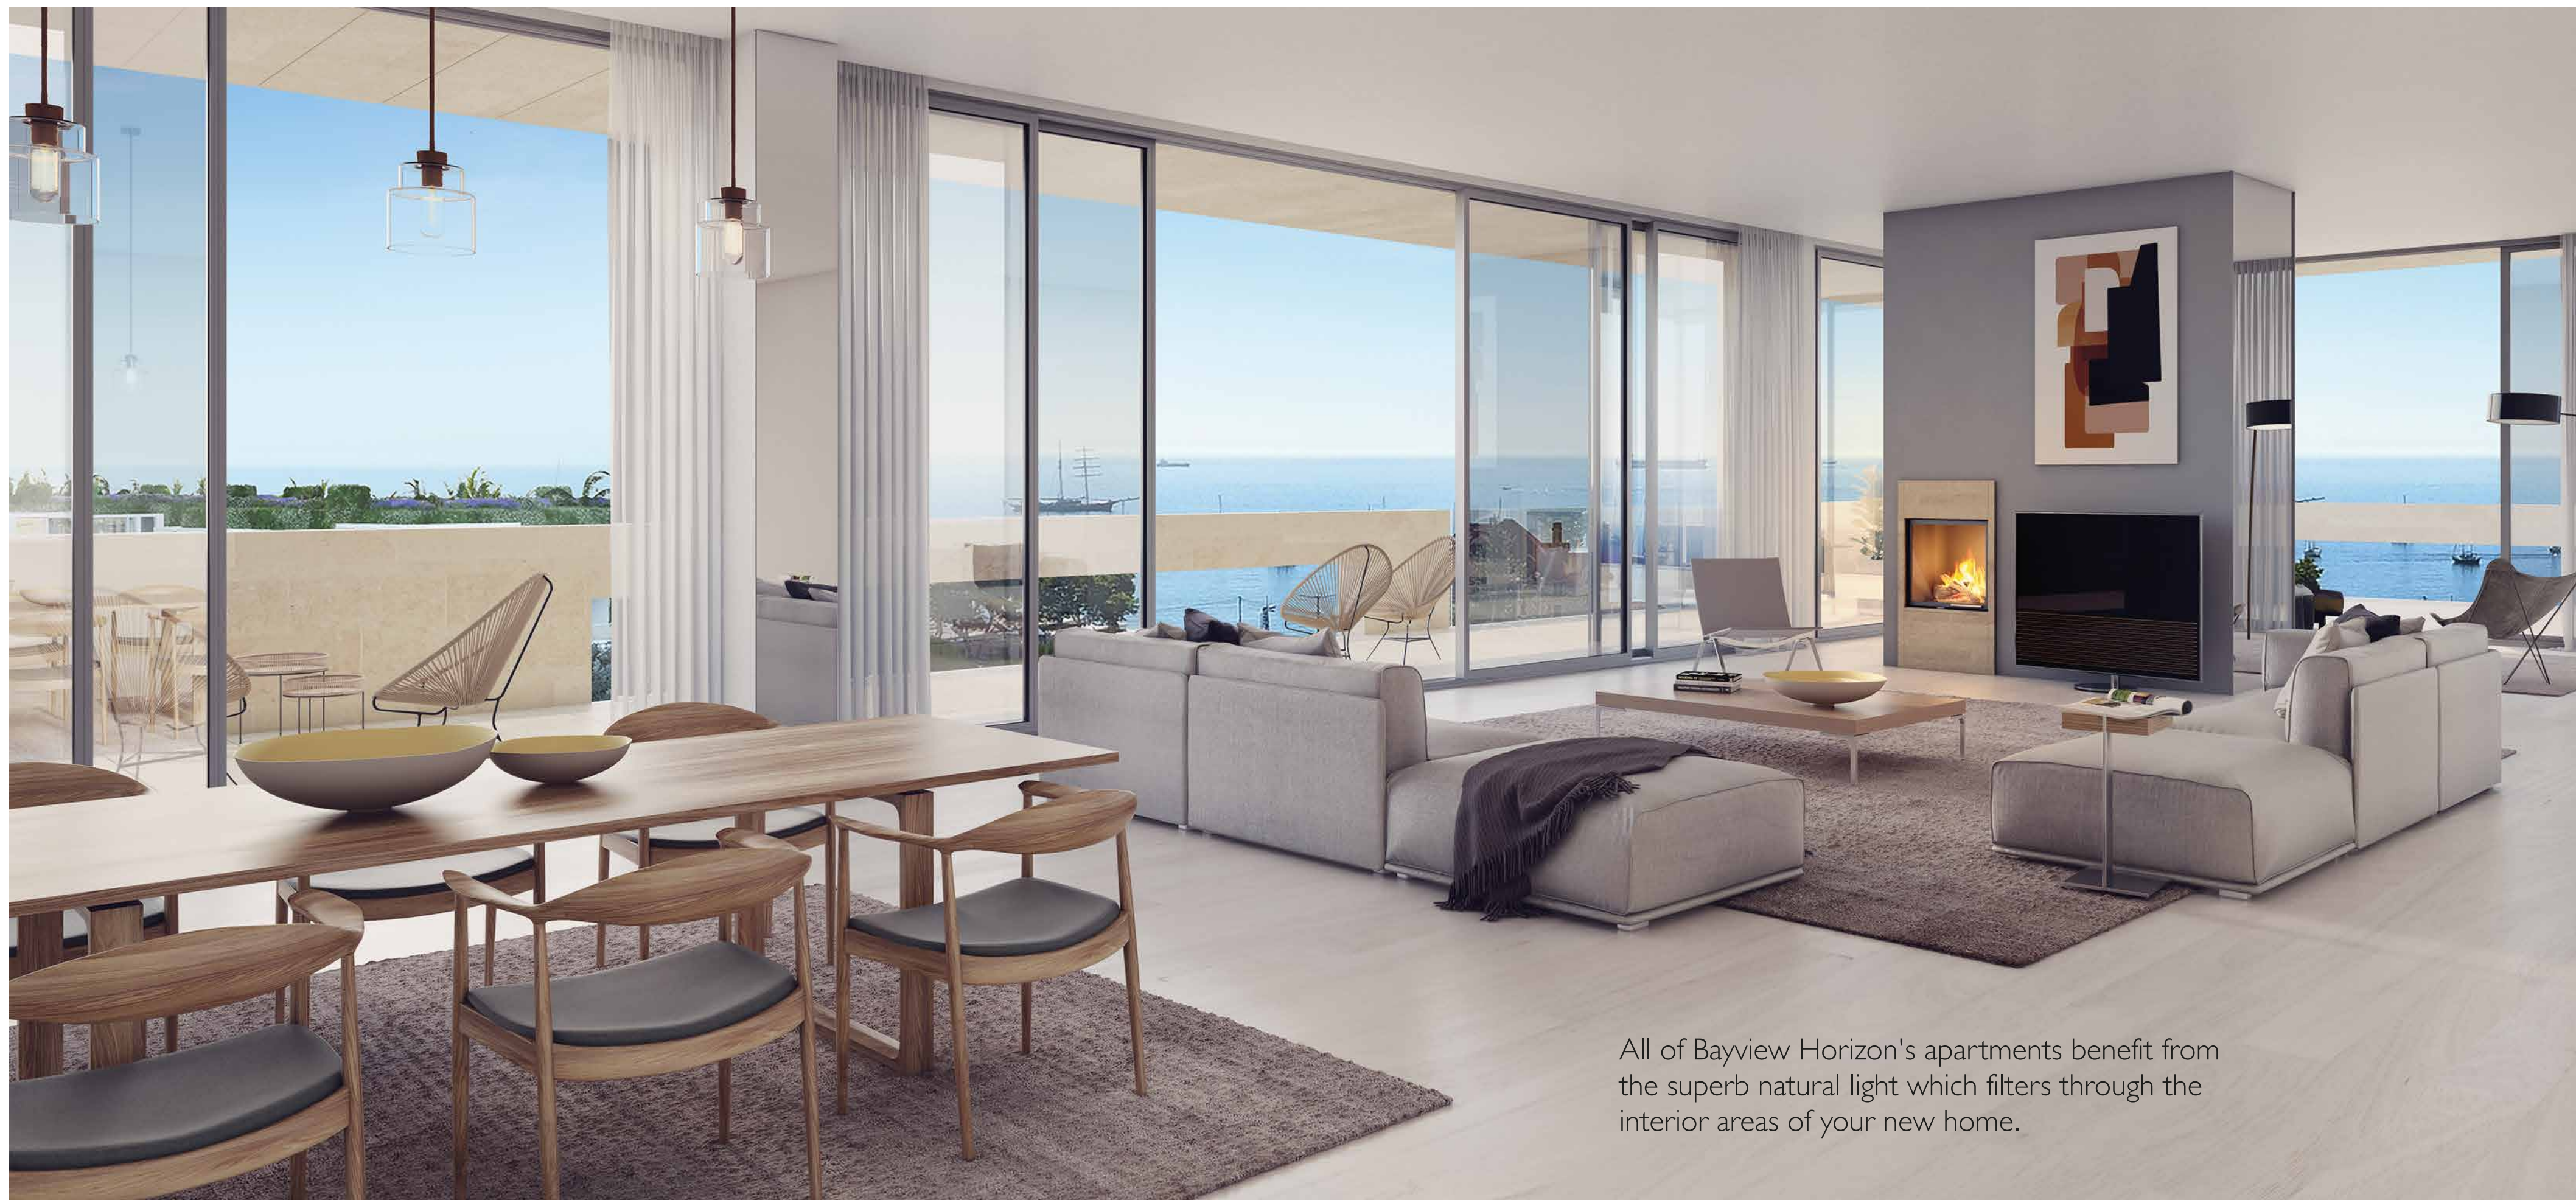

Every day, at any time, life at Horizon will be painted with blue from the living rooms, bedrooms or balconies. From where the sea and the sky are ever present.

Horizon's facade is defined by strong architectural lines which are evident in the geometrically positioned terraces and balconies, an invitation to a contented life.

All of Bayview Horizon's apartments benefit from the superb natural light which filters through the interior areas of your new home.

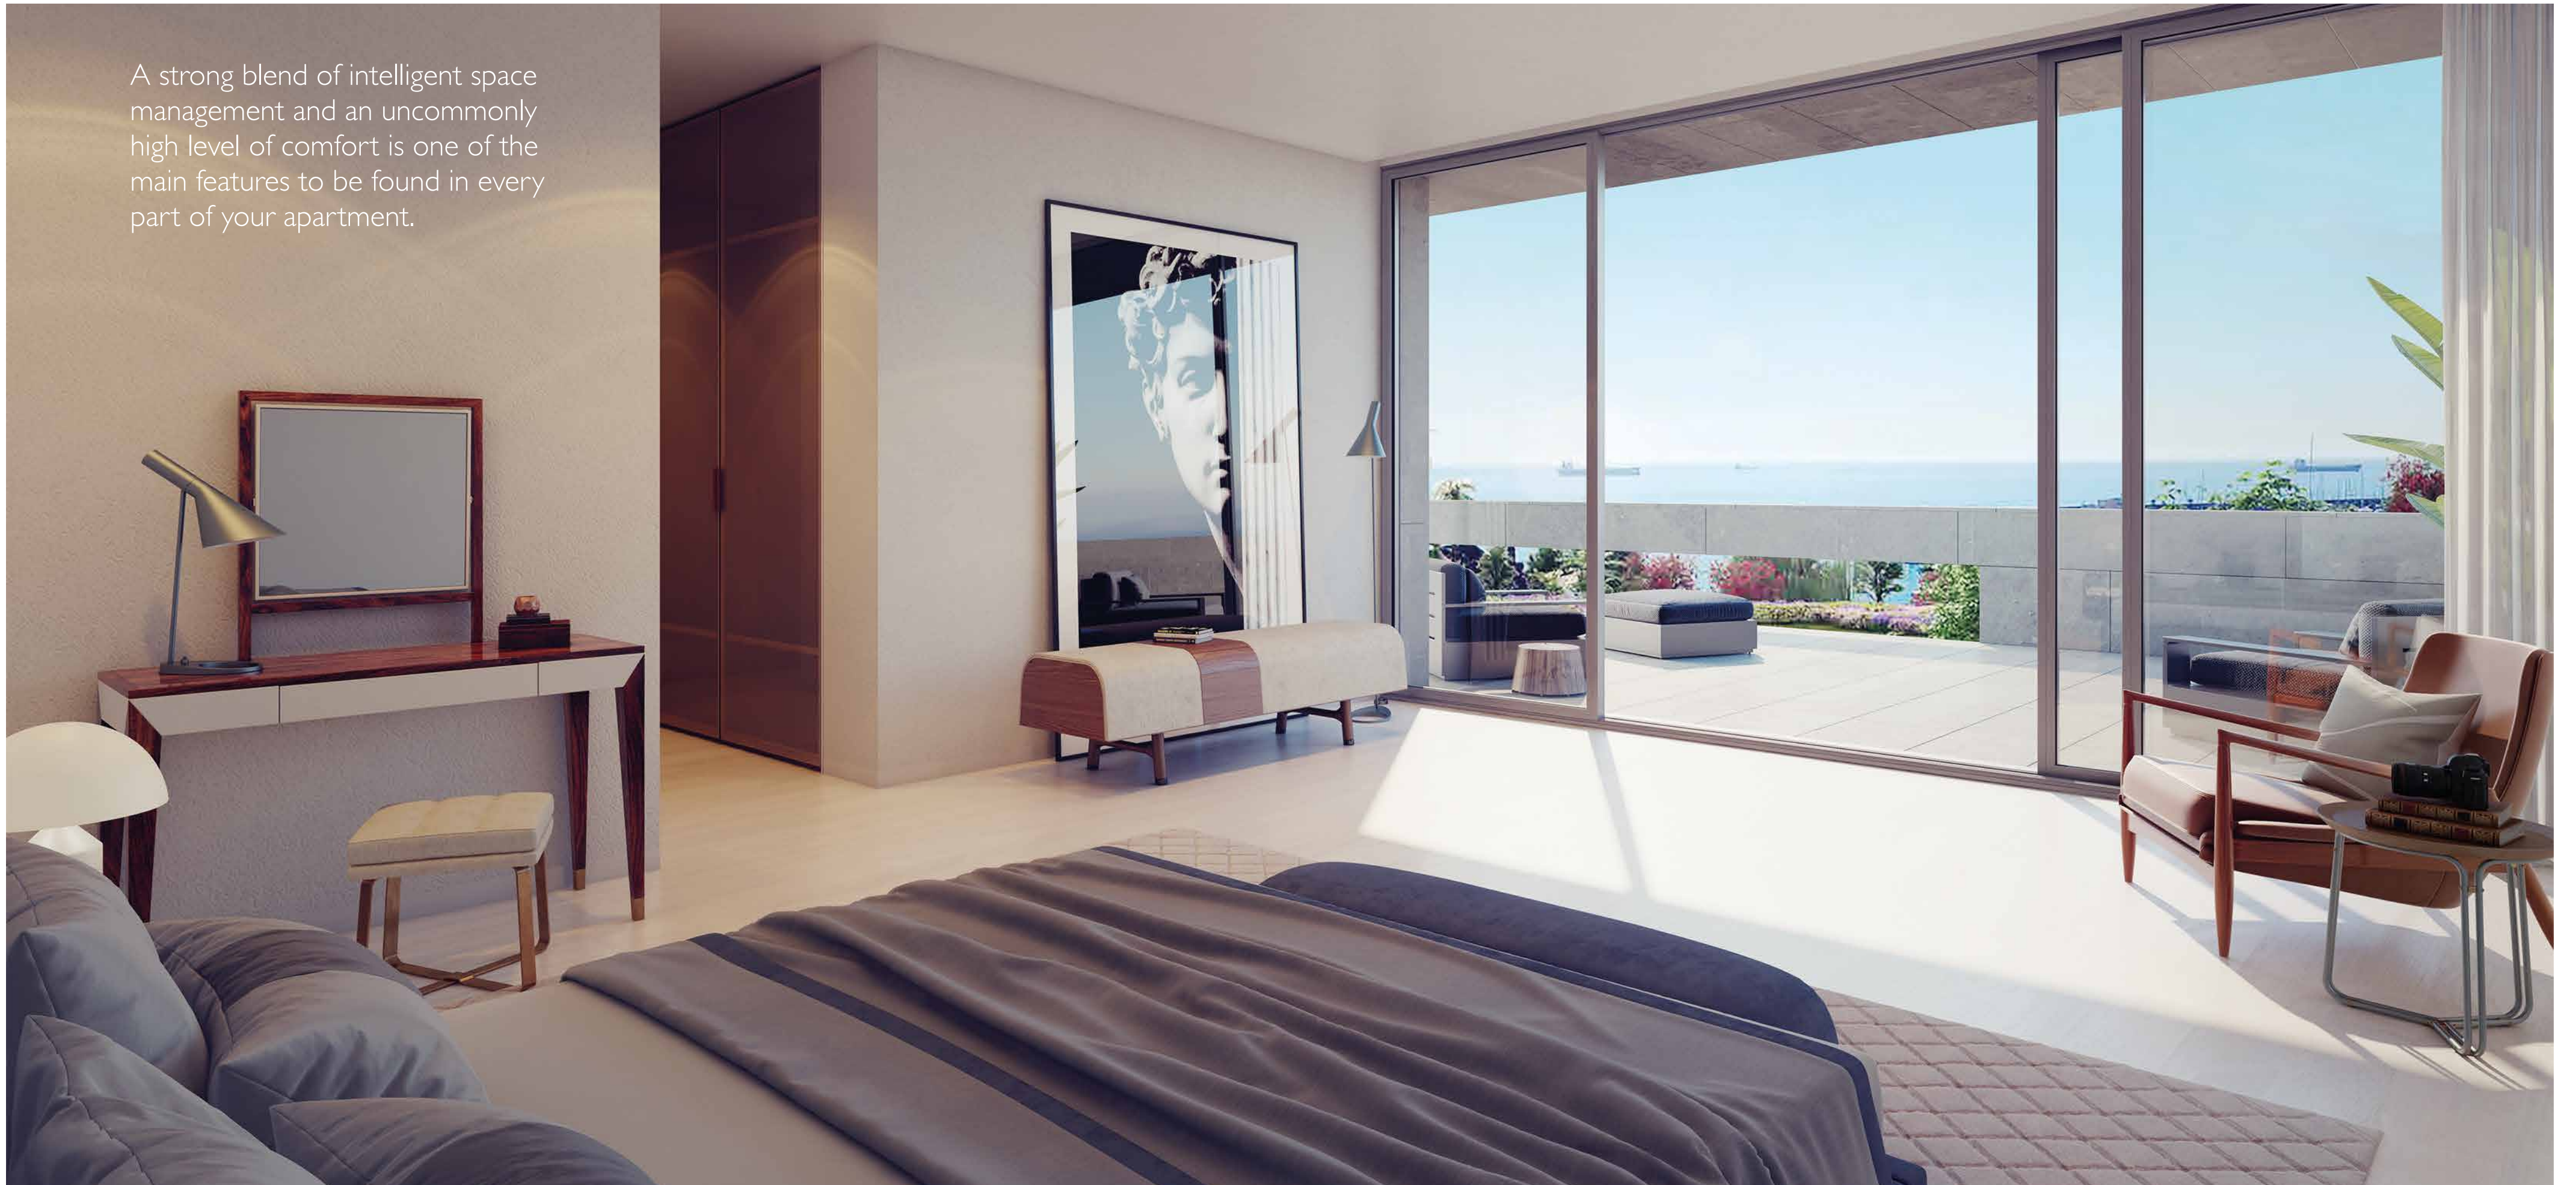

From one to four bedroom apartments, Horizon lives up to its name with no better place to take advantage of an average of 300 days of sun per year than from your balcony.

A strong blend of intelligent space management and an uncommonly high level of comfort is one of the main features to be found in every part of your apartment.

Horizon's first class quality is further complemented by a choice of materials and finishes of the highest level.
